

A

Chicago del Sol: Energy from the Sun!

1. **Butterfly Haven:** How do butterflies get energy from the sun?
2. **Wilderness Walk:** How do ants that live underground get their energy from the sun?
3. **Grossology:** Find the *Food for Thought* game. Push the button. How do our bodies change food into body energy?
4. **City Science Basement:** Watch the solar energy video. How is the sun turned into energy to run the washer and dryer?
5. **Water Lab:** How does the sun give energy to the fish in the fish tank?

B

Chicago del Sol: Energy from the Sun!

1. **Butterfly Haven:** Caterpillars get sun energy by eating plants. Butterflies get sun energy from the nectar of fruits and flowers.
2. **Wilderness Walk:** Ants come up from their tunnels to get plants and small insects. They eat these to get sun energy.
3. **Grossology:** Juices in our body break up food and separate out the energy. The energy goes to our blood and muscles—everything else turns into poop!
4. **City Science Basement:** Light from the sun hits the solar cells. This makes electricity to run the washer and dryer.
5. **Water Lab:** The sun feeds algae and plankton in the water. Small fish eat these and big fish eat small fish to get sun energy.
